

It's Simple! Refer a Friend to Apply for Board Certification Through Eminence!

The strength of any organization lies in the expertise and quality of its members.

Since 1955, the American Academy of Environmental Engineers and Scientists has been recruiting Environmental Engineers and, more recently, Environmental Scientists who have demonstrated abilities and understand the value of Specialty Certification.

The Academy established the "Certification Through Eminence" pathway for induction into AAEES as Board Certified Environmental Engineer (BCEE), Board Certified Environmental Engineering Member (BCEEM) for environmental engineers without a PE license, or Board Certified Environmental Scientist (BCES), to identify and recognize highly-qualified professionals by virtue of the accomplishments of these eminent environmental engineers and environmental scientists.

Our current BCEEs, BCEEMs, and BCESs are the Academy's best ambassadors and recruiters. You know who among your colleagues are, by experience and knowledge, prepared to become Board Certified Through Eminence.

We want to raise the visibility of the Academy and its members. To help us achieve that goal, the Academy asks you to help an environmental professional become specialty certified as a BCEE, BCEEM, or a BCES of the Academy.

YES, I will help a colleague succeed professionally by becoming Board Certified through Eminence.

Please send an application for **Environmental Engineering** OR **Environmental Science** to the following person:
