

It's Simple! Refer a Friend to Apply for Board Certification!

The strength of any organization lies in the expertise and quality of its members.

Since 1955, the American Academy of Environmental Engineers and Scientists has been recruiting Environmental Engineers and, more recently, Environmental Scientists who have demonstrated abilities and understand the value of Specialty Certification.

Our current Board Certified Environmental Engineers and Board Certified Environmental Scientists are the Academy's best ambassadors and recruiters. You know who among your colleagues are, by experience and knowledge, prepared to become Board Certified.

We want to raise the visibility of the Academy and its members. To help us achieve that goal, the Academy asks you to help an environmental professional become specialty certified as a BCEE or a BCES of the Academy.

YES, I will help a colleague succeed professionally by becoming a Board Certified Environmental Engineer (BCEE) or a Board Certified Environmental Scientist (BCES).

Please send an application for **BCEE OR BCES** to the following person:

Name

Title

Company

Address

City

State

Zip
